

February 27, 1920.

Mr. I. W. Clokey,
802 Equitable Bldg.,
Denver, Colo.

My dear Sir:

I have been unable to reply to your letter of Jan. 26 until I could see how some negotiations that I had already begun for exchanges would turn out. But I now see that I shall have some material for you; for instance I can send you a set of 122 sheets collected by Mr. Johnston in Southern California, a few sheets of sedges duplicates from The Baker Herbarium, and perhaps 200 sheets of grasses, likewise duplicates from the Baker Herbarium; if you care for any of these. I have no material of my own collecting now available for exchange except some New York state plants. If you care to enter into exchange relations with us for any of this material, I shall remember you during my collecting this season and get sedges especially for you.

I am interested in the Colorado flora. Having been raised in Denver. This summer on a visit home, I collected a small set of about 300 plants in the Tolland region.

Very truly yours,
